<b>2</b>	<b>Project Goal</b>	
•	Goal	
•	User Type	
<b>3</b>	<b>Requirement</b>	
<b>4</b>	<b>Future Scope</b>	
<b>5</b>	<b>Conclusion</b>	

- A portfolio is a collection of work samples that you can bring to an interview, send to a prospective employer, or even post online. They can: Provide evidence of work that you've done. Illustrate your skills and abilities.

- Portfolio is a website where a person store his or her all professional info like his educational qualification and his skill set. Nowadays people like to share a portfolio link rather than CV or business card, We can share our all our social links like Facebook ,GitHub ,Link-den profile within our portfolio. A portfolio is like a person online world .He can his share his achievements beside his project .Some people share there thought on his portfolio blog section . As a student of CSE ,one must have a portfolio website.

**There's a lot of mess management application out there such as**

- Shane - React Personal Portfolio
- Kuon Yagi

**Many features would be included in this project, such as**

- Home section
- About me
- Skill
- Language
- Blog

## Two types of User

- Visitor
- Admin

# Developing a Portfolio Requirements

## Language

- Front-end : HTML, CSS and JavaScript
- Back-end : PHP

## Framework

## Environment

- apache
- MySQL Server
- XAMPP

## IDE

- PhpStorm
- VSCode

**This project could benefit from more features.**

- Single Page application
- More optimize
- More faster

- I strongly feel that i can represent myself professionally with my portfolio.
