Abstract—**A portfolio is a collection of work samples that you can bring to an interview, send to a prospective employer, or even post online. They can: Provide evidence of work that you've done. Illustrate your skills and abilities.**
n
Index Terms—**front-énd,back-end**

I. Introduction

Portfolio is a website where a person store his or her all professional info like his educational qualification and his skill set. Nowadays people like to share a portfolio link rather than CV or business card, We can share our all our social links like Facebook ,GitHub ,Link-den profile within our portfolio. A portfolio is like a person online world .He can his share his achievements beside his project .Some people share there thought on his portfolio blog section . As a student of CSE ,one must have a portfolio website.

II. Literature Review

Matt Farley (mattfarley.ca),Rafael Caferati(caferati.me)

III. Proposed Methodology

As portfolio is a simple website so we don't need any complex back-end. The front end comprises of the visually visible parts such as the home page, admin panel, contact page, shopping cart page. The back end contains the database and its interaction with the front-end.

A. Front-end Development

We will use HTML,CSS and JavaScript for the portfolio front end.We will also PHP for the development. We also bootstrap for responsive.

IV. Conclusion and Future Work

In future, i will do it with react ,and make my portfolio more attractive and smooth .

Acknowledgment

I would like to thank my honourable **Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
